Experience

Senior Software Engineer 2022–Present

Example Studio

- Led the development of accessible planning tools for cross-functional teams.
- Reduced report preparation time by 35% through a reusable data validation workflow.
- Partnered with design and customer teams to simplify onboarding and document editing.

Software Engineer 2019–2022

Northstar Example Cooperative

- Built reliable services in TypeScript and SQL with clear operational documentation.
- Introduced automated checks for data quality and keyboard accessibility.

Projects

Community Resource Directory 2024

Independent project

- Designed a searchable directory that helps residents find local support services.
- Implemented a responsive interface, clear content hierarchy, and accessible navigation.

Education

Example State University 2015–2019

B.S. in Computer Science

- Coursework: software engineering, data structures, human-computer interaction.

Skills

Languages and tools

TypeScript, Rust, Python, SQL, Git, Figma

- Accessibility, user research, technical writing, and cross-functional collaboration.
