Experience

Senior Software Engineer

2022–Present

Example Studio

- Led the development of accessible planning tools for cross-functional teams.
- Reduced report preparation time by 35% through a reusable data validation workflow.
- Partnered with design and customer teams to simplify onboarding and document editing.

Software Engineer

2019–2022

Northstar Example Cooperative

- Built reliable services in TypeScript and SQL with clear operational documentation.
- Introduced automated checks for data quality and keyboard accessibility.

Additional project 1

2017–2019

Synthetic pagination review

- Coordinated an iterative delivery process with regular review of content and accessibility.
- Documented decisions, tested recovery paths, and maintained clear handoffs across the team.
- Preserved complete source information when preparing longer professional documents.

Additional project 2

2017–2019

Synthetic pagination review

- Coordinated an iterative delivery process with regular review of content and accessibility.
- Documented decisions, tested recovery paths, and maintained clear handoffs across the team.
- Preserved complete source information when preparing longer professional documents.

Additional project 3

2017–2019

Synthetic pagination review

- Coordinated an iterative delivery process with regular review of content and accessibility.
- Documented decisions, tested recovery paths, and maintained clear handoffs across the team.
- Preserved complete source information when preparing longer professional documents.

Additional project 4

2017–2019

Synthetic pagination review

- Coordinated an iterative delivery process with regular review of content and accessibility.
- Documented decisions, tested recovery paths, and maintained clear handoffs across the team.
- Preserved complete source information when preparing longer professional documents.

Additional project 5

2017–2019

Synthetic pagination review

- Coordinated an iterative delivery process with regular review of content and accessibility.
- Documented decisions, tested recovery paths, and maintained clear handoffs across the team.
- Preserved complete source information when preparing longer professional documents.

Additional project 6

2017–2019

Synthetic pagination review

- Coordinated an iterative delivery process with regular review of content and accessibility.
- Documented decisions, tested recovery paths, and maintained clear handoffs across the team.
- Preserved complete source information when preparing longer professional documents.

Additional project 7

2017–2019

Synthetic pagination review

- Coordinated an iterative delivery process with regular review of content and accessibility.
- Documented decisions, tested recovery paths, and maintained clear handoffs across the team.
- Preserved complete source information when preparing longer professional documents.

Additional project 8

2017–2019

Synthetic pagination review

- Coordinated an iterative delivery process with regular review of content and accessibility.
- Documented decisions, tested recovery paths, and maintained clear handoffs across the team.
- Preserved complete source information when preparing longer professional documents.

Additional project 9

2017–2019

Synthetic pagination review

- Coordinated an iterative delivery process with regular review of content and accessibility.
- Documented decisions, tested recovery paths, and maintained clear handoffs across the team.
- Preserved complete source information when preparing longer professional documents.

Projects

Community Resource Directory

2024

Independent project

- Designed a searchable directory that helps residents find local support services.
- Implemented a responsive interface, clear content hierarchy, and accessible navigation.

Education

Example State University

2015–2019

B.S. in Computer Science

- Coursework: software engineering, data structures, human-computer interaction.

Skills

Languages and tools

TypeScript, Rust, Python, SQL, Git, Figma

- Accessibility, user research, technical writing, and cross-functional collaboration.
